TRUE RENEW.™

This design overview of the Transformations line is not intended to be a complete listing of all products available.

Chairs are featured here but, of course, all designs are available as loveseats and sofas as well.

Many designs are available as sofa beds, loveseat beds, wide chairs, ottomans and wide ottomans, in bariatric versions and in creative modular groupings. For a complete catalog, and to see a personalized demonstration of our unique furniture, please contact your Transformations representative.

This is an interactive PDF. Objects with a dotted grey rectangle around them are clickable links and will take you to the appropriate pages at trfurniture.com

WHAT MAKES FURNITURE "TRULY RENEWABLE"?

Anyone can claim their furniture is renewable. Transformations products actually *are*. All seating components can be removed easily and quickly... on location. All upholstered fabric can be removed and replaced easily. No special skills are required to disassemble the furniture. Fabrics are attached using hook and loop. The entire process can be completed in minutes.

WHAT ARE THE BENEFITS OF TRULY RENEWABLE FURNITURE?

- **MAINTAIN YOUR IMAGE** – With truly renewable furniture, your facility will look fresh and inviting all of the time.
- **SAVE TIME** – In minutes, you can replace the fabric—and even the foam, if necessary—on an arm, seat, or the entire piece quickly and efficiently...all on-site and with no special training.
- **SAVE MONEY** – Because Transformations' furniture is **Guaranteed for 35 Years** and you can change the fabric whenever you want, you'll still be using our furniture long after you've sent your ordinary furniture to the landfill. Imagine the savings! Even if you replace the entire fabric on a lounge chair, you're looking at only $\frac{1}{3}$ of the price of the original product.
- **PRESERVE THE ENVIRONMENT** – With truly renewable furniture, all you're discarding is the fabric. There's no other waste.

No one makes renewability easier than Transformations.
