

ARTISAN

v070426

Art is in the details.

The Artisan collection is a modern expression of craftsmanship—where skilled construction, thoughtful detailing, and intentional design come together to create seating that is both refined and responsible. Each piece is carefully tailored, from the softly curved back and clean seams to the tall wood legs reinforced with internal steel for lasting strength and stability. Built on Transformations' renewable design philosophy, Artisan is made to evolve over time, with replaceable components that extend its life and reduce waste. The result is a collection that honors quality, sustainability, and enduring comfort—crafted to serve shared spaces today and adapt for tomorrow.

W = Width; D = Depth; AH = Arm Height; BH = Back Height; SW = Seat Width; SD = Seat Depth; SH = Seat Height; WT = Weight

BACK

The back frame is constructed with 3/4" engineered paneling with the support system constructed of 11-gauge sinuous wire linked together with a 12-gauge tie wire. The back support system is covered with woven material and high-density polymeric foam. The outside back of the frame is covered with woven material and an additional piece of high-density polymeric foam. The back frame is secured to the base frame with patented metal brackets attached to the base frame with metal-to-metal connections.

BASE

The base frame is constructed of 3/4" engineered paneling with support system constructed of 8-gauge sinuous wire linked together with 12-gauge tie wire. Patented metal brackets are attached with bolts into steel receivers creating a metal-to-metal connection. Legs are attached with steel bolts. Legs use plastic non-marking glides.

SEAT

Seat cushions are constructed of high-density, polymeric foam. Seat cushions are secured to the base frame with a nylon security strap.

ARM

Arm frames are constructed of 3/4" engineered paneling. The frames are covered utilizing 80-point chipboard and high-density polymeric foam. The frames are secured to the base frame with patented metal brackets attached to the base frame with metal-to-metal connections.

UPHOLSTERY

All upholstery offerings conform to California Technical Bulletin 117 fire code standard. All estimated yardage quotes are based on 54" non-matched, solid color material unless otherwise specified. Additional yardage and matching fees may apply.

MOISTURE BARRIER

Foam is wrapped with laminated, polyurethane, moisture-barrier.

ASSEMBLY AND DISASSEMBLY

All components can be disassembled and removed by loosening the thumbscrew and sliding the components out of the interlocking state. Assembly can be completed within minutes. Upholstery fastens with hook and loop, facilitating removal and replacement of covers.

WARRANTY

Transformations warrants all products against defects in materials and workmanship, and against structural damage incurred through normal use, for the specified warranty period (see product warranty chart). Some exclusions apply; see warranty document for details. The warranty is valid from the date of purchase to the original purchaser.
